Single-phase SSR

with Detachable Heatsink

Autonics

Observe all 'Safety Considerations' for safe and proper operation to avoid hazards.

- Δ symbol indicates caution due to special circumstances in which hazards may
- occur.

Safety Considerations

Warning Failure to follow instructions may result in serious injury or death.

- 01. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss.(e.g., nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime/disaster prevention devices, etc.) Failure to follow this instruction may result in personal injury, economic loss or fire.
- 02. Do not use the unit in the place where flammable/explosive/corrosive gas, high humidity, direct sunlight, radiant heat, vibration, impact or salinity may be present.
- Failure to follow this instruction may result in explosion or fire **03. Install on a device panel to use.**
- Failure to follow this instruction may result in fire or electric shock.04. Do not connect, repair, or inspect the unit while connected to a power source.
- Failure to follow this instruction may result in fire or electric shock. **05. Check 'Connections' before wiring.**
- Failure to follow this instruction may result in fire. **06. Do not disassemble or modify the unit.** Failure to follow this instruction may result in fire or electric shock.
- **Caution** Failure to follow instructions may result in injury or product damage.
- 01. Use the unit within the rated specifications.
- Failure to follow this instruction may result in fire or product damage. **02. Use a dry cloth to clean the unit, and do not use water or organic solvent.**
- Failure to follow this instruction may result in fire or electric shock.
 03. Keep the product away from metal chip, dust, and wire residue which flow into the unit.
- Failure to follow this instruction may result in fire or product damage.
 O4. Since leakage current still flows right after turning off the power or in the output OFF status, do not touch the load terminal.
 Failure to follow this instruction may result in electric shock.

Cautions during Use

- Follow instructions in 'Cautions during Use'.
- Otherwise, it may cause unexpected accidents
- 4 30 VDC model power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Attach a heat sink or install the unit in the well ventilated place.
 To attach the heat sink, use Thermal Grease as below or that of equal specification.
 Thermal Grease
- : GE TOSHIBA (YG6111), KANTO-KASEI (FLOIL G-600), SHINETSU (G746)
- Ground to the panel. Failure to follow this instruction may result in electric shock.
 While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in burn
- due to high temperature of the surface.
 In order to protect the product from the short-circuit current of the load, use rapid fuse of which l²t is under the 1/2 of SSR l²t. When short-circuited, replace the fuse to those of same specification with the used rapid fuse.
- Install dummy resistance in parallel with the load, to keep the sum of current flowing in the load and dummy resistance being over SSR minimum load current.
- When using random turn-on model for phase control, install noise filter between the load and the power of the load.
- Do not use near the equipment which generates strong magnetic force or high frequency noise.
- This unit may be used in the following environments.
 Indoors (in the environment condition rated in 'Specifications')
- Altitude max. 2,000 m
- Pollution degree 2
- Installation category III

1/L1 24-240VAC~ 15A 0UTPUT SOLID STATE RELAY SR1-1215-N SR1-1215-N CRUSCE MADE IN KOREA

SR1 Series PRODUCT MANUAL

For your safety, read and follow the considerations written in the instruction manual, other manuals and Autonics website.

The specifications, dimensions, etc. are subject to change without notice for product improvement. Some models may be discontinued without notice.

Features

- Compact, universal design for flexible installation
- High heat dissipation efficiency with ceramic PCB
- Zero cross turn-on, random turn-on models available
- Input Indicator (green)

Ordering Information

This is only for reference, the actual product does not support all combinations. For selecting the specified model, follow the Autonics website.

SR1 - 0 0	4 - N
Rated input voltage	Rated load current
1: 4 - 30 VDC== 4: 90 - 240 VAC~	Number: Rated load current (unit: A)
Rated load voltage	Function
2: 24 - 240 VAC~	No-mark: Zero cross turn-on
$4.48 - 480$ VAC \sim	R: Random turn-on

Product Components

• Product

• Instruction manual

Dimensions

- Unit: mm, For the detailed drawings, follow the Autonics website.
- When installing to the panel, tightening the screw with a torque of 1.8 to 2.5 N m.

Cautions during Installation

When installing multiple SSRs, be sure to keep space between SSRs for heat radiation.
When installing SSRs horizontally (input part and output part on the same height), be sure to supply less than 50 % of the rated load current.

Cautions for Wiring

• Unit: mm, When connecting the wire to the terminal, use the round crimp terminal.

Size	Input	Output
а	≥ 3.5 mm	≥ 5.0 mm
b	\leq 7.0 mm	\leq 12.0 mm

01) AC-51 is utilization category at IEC60947-4-3.

General specifications

Dielectric strength (Vrms)	Between the charging part and the case : 2500 VAC ~ 50 / 60 Hz for 1 min
Insulation resistance	Input-output, input / output-case : $\geq 100 \text{ M}\Omega (500 \text{ VDC} = \text{megger})$
Indicator	Input indicator (green)
Vibration	0.75 mm double amplitude at frequency of 10 to 55 Hz in each X, Y, Z direction for 1 hour
Vibration (malfunction)	0.5 mm double amplitude at frequency of 10 to 55 Hz in each X, Y, Z direction for 10 min
Shock	300 m/s ² (≈ 30 G) in each X, Y, Z direction for 3 times
Shock (malfunction)	$100 \text{ m/s}^2 (\approx 10 \text{ G})$ in each X, Y, Z direction for 3 times
Ambient temperature ⁰¹⁾	-30 to 80 °C (in case of the rated input voltage 90 - 240 VAC \sim : -20 to 70 °C), storage: -30 to 100 °C (no freezing or condensation)
Ambient humidity	45 to 85 %RH, storage: 45 to 85 %RH (no freezing or condensation)
Input terminal connection	\geq 1×0.5 mm ² (1×AWG 20), \leq 1×1.5 mm ² (1×AWG 16) or \leq 2×1.5 mm ² (2×AWG 16)
Output terminal connection ⁰²⁾	$ \geq 1 \times 1.5 \text{ mm}^2 (1 \times \text{AWG 16}), $ $ \leq 1 \times 16 \text{ mm}^2 (1 \times \text{AWG 6}) \text{ or } \leq 2 \times 6 \text{ mm}^2 (2 \times \text{AWG 10}) $
Input terminal fixed torque	0.75 to 0.95 N m
Output terminal fixed torque	1.6 to 2.2 N m
Approval	C€≌‰ ₽₽₩ № EAL
Weight (packaged)	≈ 73 g (≈ 111g)
01) See the 'SSP Derating Cupie' because	the capacity of the rated load current is differ depending on the ambient

01) See the 'SSR Derating Curve' because the capacity of the rated load current is differ depending on the ambient temperature.

02) Connect the wire met the capacity of the load current to the output terminal.

SSR Derating Curve

- Be aware that the ambient temperature and the derating curve is different by the rated input voltage when using the product.
- Rated input voltage 4 30 VDC== (SR1-1
- Rated input voltage 90 240 VAC~ (SR1-4

• Δ Since the effectiveness of the heat radiation is decreased when multiple SSRs are installed closely, be sure to supply less than 50 % of the rated load current.

SSR derating curves obtained approval from the UL certification authority.
